1. SARS-CoV-2 positive Products

COVID-19 (coronavirus disease 2019) is a viral disease caused by the **SARS-CoV-2** coronavirus. It was first discovered in Wuhan in 2019 and has spread worldwide. It is mainly caused by droplet infection, but also by smear infection or infection through the conjunctiva of the eyes.

For the research of SARS-CoV-2, we offer various samples, including single donations (panels and bulks) for the validation of test systems and pools and controls used for external and internal quality control (e.g. proficiency testing).
